

Introducing SmartLink.

The world's first intelligent, affordable, web-based irrigation control system that gives you the power to dramatically reduce water usage and maximize landscape beauty from virtually anywhere.

SAVE WATER AND BEAUTIFY YOUR LANDSCAPE WITH SMARTLINK™ NETWORK

Imagine having immediate access to every element of your irrigation system. With the SmartLink Wireless Landscape Network, you and your landscape professional have unprecedented control over your system.

What does this mean to you?

Now your landscape professional is capable of making a simple programming change, monitoring the health of the system, or even being alerted if a problem occurs. He can instantly shut down your system in an emergency and help you comply immediately with local watering restrictions, avoiding costly fines.

COMPUTER

SMARTPHONE

TABLET

Gain access to the SmartLink Network via any device that connects to the internet. Adjusting all of your controller's parameters is surprisingly easy. And with real-time reporting, you get visibility showing exactly how much water you are saving.

A Smarter way to save.

Conventional timer-based systems water on weekly schedules that once programmed, are rarely changed. Because of this, they tend to over-water by 20-60%. They also do not take into account seasonal, soil, plant and weather conditions. Over-watering injures plants and creates runoff that can lead to costly damage to paths and driveways.

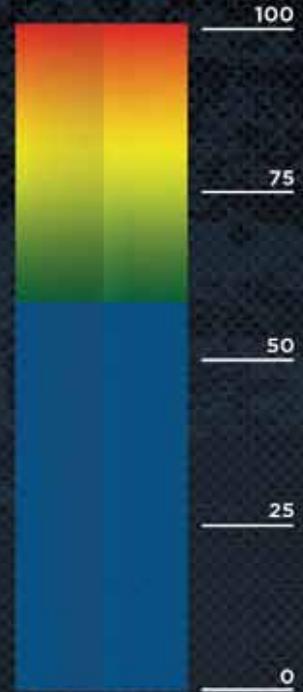

The SmartLine Controller is the water-saving control system in SmartLink. It has been installed on more than 200,000 properties saving an average of 38% in water use by taking into account all the necessary conditions to maximize irrigation efficiency.

62% LANDSCAPE REQUIREMENT

38% EXCESS WATERING

WATER BILL

What SmartLink can do for you.

Dramatic Water Savings.

Saves an average of 38% on water with auto adjust features which precisely irrigate.

Landscape Beautification.

Weather-sensitive irrigation avoids over-watering or under-watering to extend plant life.

Real-Time Reporting.

Water savings reports help you regularly see the benefits of Smart weather-based irrigation.

Freeze Protection/Rain Delay.

Automatically prevents watering during freezing conditions and prevents irrigation in the event of a pre-determined rainfall.

Reduce Hardscape Damage.

Avoid costly damage to footpaths and driveways from water run-off.

Immediate Compliance.

Web-based programming for quick compliance with water restrictions to avoid potentially costly fines.

Web-Based Control.

Enable your contractor to instantly shutdown your system in an emergency.

No petrol required.

Eliminates the need to send someone physically to your property if programming changes are required.

NOW YOU HAVE CONTROL OF YOUR CONTROLLER

The most important part of an irrigation system is the controller. Like the dashboard of a car, you need to have critical information provided to you in order to drive. Sadly, conventional controllers do not have the technology to give you the feedback and control needed to run your system efficiently. There's nothing conventional about SmartLink. Go Smart. Go SmartLink.

SmartLink™ 
Wireless Landscape Network

Conventional Sprinkler Timer

Overwater due to schedule-based control and often damaging landscape.	Auto adjusts due to weather and other key factors to save 20-60% in water and improved plant health.
Lose program from memory leading to overwatering and damaged landscape.	Retains information on secure servers so programs are never lost.
May not comply with watering restrictions resulting in possible fines.	Web-based control to quickly address restrictions and special events.
No Indications of system failures until landscape is lost or possible watering fines.	Email alerts of system faults and problems.
No indication of total water usage.	Real-time reports demonstrate water savings.
Low efficiency = over watering to limit landscape loss due to weather changes	High efficiency = Automatically adjusted watering times based on the weather to save 20-60%
No remote monitoring or reporting	Fault monitoring and reporting of water savings

THE SMARTLINK NETWORK INCLUDES THE SMARTLINE CONTROLLER, SMARTLINK AIRCARD, AND WEATHER STATION. COMBINED, THERE'S NOTHING ELSE LIKE IT.
